CS411 Quiz 1 - SDLCs

Please answer the following questions and turn your completed PDF in on Gradescope.

1. What is the primary goal of using an iterative process / methodology to design and build software? In other words, why do we use the same process over and over?
2. What's the main difference between incremental delivery and incremental development?
3. Why is the waterfall methodology called a fail-late process?
4. We've looked at a couple of SDLCs at this point, and one takeaway is that they are all similar, even though they use different terms for their steps or phases. What is the generic version of an SDLC? (It's the one with a bunch of 'D's')
5. What are the four steps of the Rational Unified Process?
